SUMMARY

Experienced Software Developer with a demonstrated history of working in the banking, retail and business industries. Skilled in Public Speaking, Flutter, Java, DotNetCore, JavaScript and Typescript. Strong engineering professional graduated from ITLA and some certifications focused on development skills of ReactJS, Angular2+, Java Spring Boot, Flutter, C# DotNetCore, SQL and others.

WORK HISTORY

Scotiabank
Developer Analyst
May 2019 – April 2020

Had the opportunity to help customers through internal mobile applications to retrieve their information in real time to provide faster services and perform many updates to internal systems. My responsibilities can be summarized as follows:

- Native mobile application development
- Support and maintain internal applications
- Update databases to increase performance
- Create and maintain ETL's
- Support and fix internal applications issues in real-time

Technologies:

- ASP.NET
- .NET 5
- C#
- ASP.NET Core
- SQL
- Java Android Studio
- SQLite
- JavaScript

Newtech

Software Engineer
April 2020 - June 2022

I started as a software developer working directly with a CRM and core library developing new features and supporting bug fixes. I had the opportunity to become the Software Engineer Team Lead to perform a migration from Angular 5 to Angular 9 with an awesome team of 5 software engineers. My responsibilities can be summarized as follows:

- Support and maintain applications
- Perform new features and integrate external API's
- Code review
- Task assignment
- Support developer colleagues with development or business understanding
- Keep up to date with external backend API updates
- Requirements acceptance based on time and technologies

Technologies:
- Java Spring Boot
- Angular 2+
- JavaScript
- TypeScript
- Primefaces
- Bootstrap
- Jenkins
- Apigee
- NgRx
- Google Analytics
- Google Maps

LABORATIO, LLC

Application Engineer
May 2021 - Nov 2022

I started as a part-time contractor software developer providing development services to create and maintain software products. My responsibilities can be summarized as follows:

- Support and maintain applications
- Support developer colleagues with development or business understanding
- Create web applications
- Create mobile cross platform applications

Technologies:
- Java Spring Boot
- Angular 2+
- JavaScript
- TypeScript
- Primefaces
- Bootstrap
- Quickbase
- Node
- VanillaJS
- Ionic
- AWS

Banco Popular Dominicano
Project Lead
Dic 2022 - June 2023

I started as a full-time Project Lead providing management services to follow up incidents from beginning to fix, follow up new features, requirements and enhancements of current products/projects with external providers to complete the development and implement it as well. My responsibilities can be summarized as follows:

- Support and maintain applications leading external providers
- Support colleagues with fix of incidents or business understanding
- Fulfill bank policies in each fix/enhancement/feature developed by the providers
- Follow implementations in each stage: analysis, documentation, development, testing and implementation.

Technologies:

- Java SpringBoot
- JavaScript
- C#
- PLSQL

- Bootstrap
- JIRA
- SonarQube
- MS Toolkit
- Tortoise

- Virtual SVN Server
- SOAPUI
- MS Queue Mng
- SQL Server

Supermercados Bravo

Fullstack Solution Engineer

June 2023 - November 2024

I started as a full-time Backend Solution Engineer, taking care of the development of new API's and services as well, but also I took responsibilities for developing new frontend projects from requirements to code. Today, I'm performing as a Fullstack Solution Engineer leading projects, leading external teams and developing solutions alone but also with team players. My responsibilities can be summarized as shown below:

- Support and maintain applications
- Support colleagues with fix of incidents or business understanding
- Code review
- Perform new features and integrate external API's
- Develop new frontend applications
- Develop new backend API's
- Enhance/fix current Android mobile app
- Follow projects in each stage: analysis, architecture, documentation, development, testing and implementation.

Technologies:

- Java SpringBoot
- Angular 2+
- Reactjs/ts
- JavaScript
- NestJS
- PLSQL
- MSSQL
- Hibernate
- Jooq
- Git - Bitbucket
- MUI

- Bootstrap
- JIRA
- SonarQube
- Jenkins
- Confluence
- Junit
- Vitest
- Google Cloud
- Java Android Studio
- Python
- OpenAI

Transperfect
Senior Software Engineer
November 2024 - Now

I started as a full-time Senior Software Engineer, following new requirements and taking care of new projects and implementations in the backend and frontend side. My responsibilities can be summarized as shown below:

- Support and maintain applications
- Support colleagues with fix projects issues
- Code review
- Perform new features and integrate external API's
- Develop and support new frontend applications
- Develop and support new backend API's

Technologies:

- DotNetCore
- Reactjs/ts
- JavaScript
- MSSQL
- Hibernate
- Jooq
- Git - Azure
- MUI

- Bootstrap
- Sass
- Azure Pipelines
- Confluence
- NUnit
